

KATEX DELIMITER FIXTURE

Inline escaped delimiters: a

Display escaped delimiters:

$$\frac{a}{b}$$

Inline dollar delimiters: x_1

Display dollar delimiters:

$$y_2$$

Beta prior (file 05 §22.2):

$$\hat{p}(\ell,t) \, = \, \frac{k_{\ell,t} + \alpha_t}{n_{\ell,t} + \alpha_t + \beta_t}, \qquad \frac{\alpha_t}{\alpha_t + \beta_t} = p_t^0, \quad \alpha_t + \beta_t = 4$$

with $p_{T1}^0 = 0.5, p_{T2}^0 = 0.25, p_{T3}^0 = 0.05$ as starting priors. Labels are coarsened when $n < 8$.
